

December 9, 2010

Marlene Dortch
Secretary
Federal Communications Commission
Washington, DC 20554

Docket No. GN 09-51
Docket No. PS 06-229
Docket No. WC 05-25
Docket No. RM 11592
Docket No. WT 05-265

Dear Ms. Dortch:

On December 8, 2010, Mary Dillon, President and CEO of US Cellular along with the undersigned, met with FCC Commissioner Michael Copps and his Chief of Staff John Giusti to discuss the attached presentation.

During the course of that discussion, US Cellular urged the Commission to:

- Move quickly to adopt an automatic data-roaming rule.
- Issue an order addressing issues of handset interoperability across the 700 Mhz spectrum in order to facilitate the nationwide deployment of a cohesive 4G network.
- Expressed support for the incentive auctions of spectrum and the adoption of small license area sizes for said auctions. In addition, US Cellular expressed support for having the Commission revisit the Company's prior proposals for a regional public-private partnership model for a commercial auction of the 700 Mhz D-Block spectrum.
- Urged the Commission to push forward with Special Access Reform in the above-entitled docket.

- Argued for adoption Universal Service Fund policies that provide adequate opportunities for wireless deployment in future USF programs adopted by the Commission.

Sincerely,

/S/

Grant B Spellmeyer
Senior Director – Legislative & Regulatory Affairs
